

# NITROBOX AGILE MONETIZATION PLATFORM

## We're turning your ideas into revenue

**Nitrobox Finance Platform** is an enterprise-grade cloud software for managing sophisticated monetization models: transactional, recurring, usage based or any hybrid model. Nitrobox provides all capabilities within one single platform, made for building and running complex payment billing and accounting processes of digital business models. The state-of-the art technology is fast, easy to integrate, reliable and secure. Based in Hamburg and Cracow, Nitrobox operates on a global level and collaborates with clients from more than 70 countries around the world.

### BENEFITS

#### REVENUE GROWTH

Achieve top-line growth with recurring revenues and reduced time-to-market.

#### CONNECTED

Push digital transformation with our open API and ecosystem.

#### EFFICIENT

Reduce operational cost and increase efficiency with fully automated processes.

#### CUSTOMER CENTRICITY

Increase customer lifetime value by ensuring great customer experience.

#### AGILE

Maximize business agility with real-time changes in offers and processes.

#### SUPPORTIVE

Rely on our delivery experts, partners, support and training program.

### CAPABILITIES

#### MONETIZATION STRATEGY

- Model any monetization strategy with unlimited options: subscriptions, usage based, transactional or hybrid
- Execute changes in real-time and roll-out new offers within minutes

#### REVENUE RECOGNITION

- Fully automatic revenue recognition including deductions, tax or refunds
- Manage subledgers, debtors, accounts and financial reportings

#### CONTRACT LIFECYCLE MANAGEMENT

- Manage contracts from creation to fulfillment
- Respond to changes in real-time and manage the whole process in one single platform

#### API FIRST AND USER INTERFACE

- High performance REST-API provides an easy integration into current systems
- Modern browser and API based frontend using latest web technology

#### CONVERGENT BILLING

- Convergent billing in any language, currency and layout
- Connect any type of data for usage rating and dynamic pricing

#### PERFORMANCE AND RELIABILITY

- 99.9% availability and high performance
- Cloud native platform built on best in class infrastructure and auto-scaling architecture

#### PAYMENT AUTOMATION

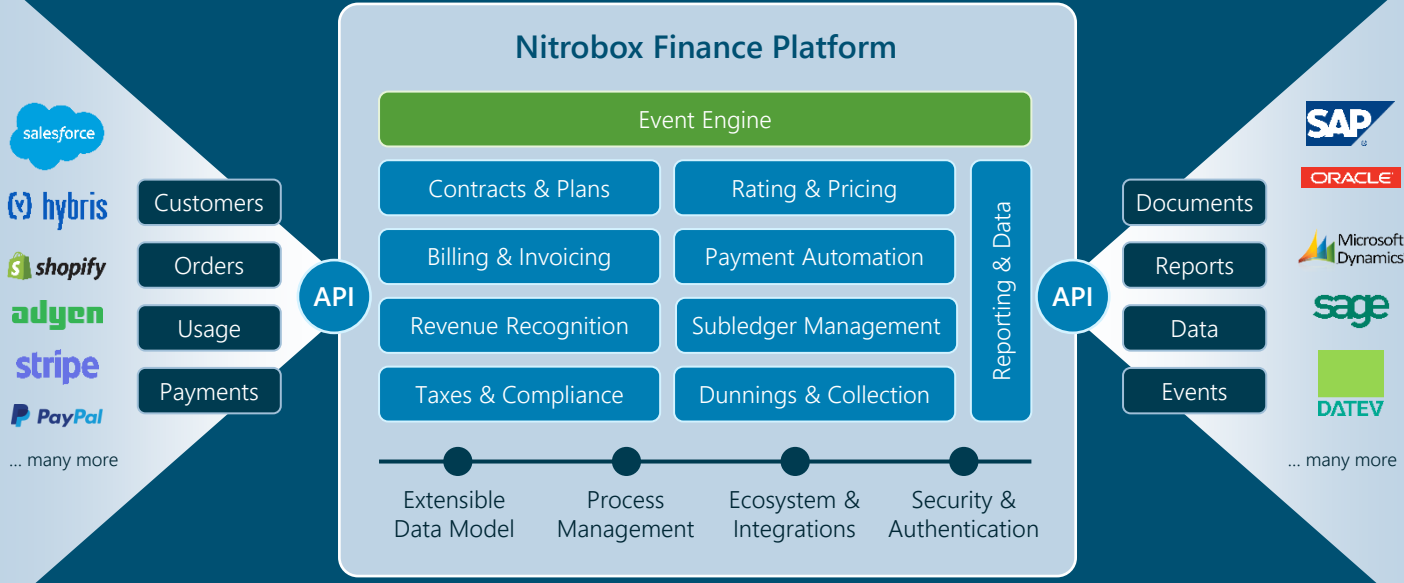

- Integrate any payment provider or bank account
- Automated processing of chargings, refunds and settlements

#### DEPLOYMENT AND OPERATION

- Deploy and operate on any public or private cloud infrastructure
- Fully managed via Kubernetes and Docker
